

## First project hello world:

```
hii.java x hellomain.java
1 package helloworld;
2
3 public class hii {
4     public static void main(String[] args) {
5         System.out.println("hello world");
6     }
7
8 }
9 |
```

Problems Javadoc Declaration Console x

<terminated> hii [Java Application] C:\Users\manoj\.p2\pool\plugins\org.eclipse.justj.op  
hello world

## MySecond project:

```
hii.java  hellomain.java ×
1 package mysecondproject;
2
3 public class hellomain {
4     public static void main(String[] args) {
5         System.out.println("hello again world");
6     }
7
8 }
9
```

Problems Javadoc Declaration Console ×

<terminated> hii [Java Application] C:\Users\manoj\.p2\pool\plugins\org.eclipse.just  
hello world
